IT'S ALL ABOUT VISIONEERING

Abaska Technologies

Solutions for the New World

We have established ourselves in software development services. We take pride in providing practical, viable and quality solutions. We have a great team of professionals with vision to grow with our partners. We have a history of successful projects and our happy customers endorse it.

We provide solutions to clients, using techniques that are based on current standards of software engineering and project management. We help our clients by defining requirements for tools and recommend techniques and training to satisfy your requirements. This enables our clients to have a good relationship with their customers by focusing on the requirement, design, testing and configuration.

Mission Statement

Our Mission is to exceed client's expectations by providing high quality, secure, affordable and timely solutions based on latest IT technologies and techniques for small, medium and large business enterprises.

Our Objective is for the customers to receive the highest value for the price they pay by addressing the cost effective and revenue generating measures for its customers.

Vision

We definitely believe in quality software made by people with true passion and vision. Better architecture, design and open standards are driving principles behind everything we do. We believe in durable professional relationships based on integrity, quality, and excellence in client service and support. Our vision is to expand our customer organization's value by providing them better IT solutions.

Cloud Developers

Abaska Technologies focuses in supplying dedicated mobile, web and software developers that work from our fully managed offices in the Pakistan. With Zero Setup cost we provide companies with instant offshore operations. Whether you are looking for single developer or a team of developers, we are the right company for you in terms of resource outsourcing.

We have highly talented, Fluent English speaking IT professionals that will work directly for you. Communication through most power full and professional tool such as Skype on high speed internet will no longer let you feel that you and your developer(s) are not in the same room. Unlike other offshore agencies Abaska Technologies provides complete reliability and security to the companies. We sign NDA with our clients in order to make them sure that their data will remain highly confidential. By using latest repository tools, i.e. GitHub or SVN, we make sure that each project have a proper backup system.

A Brand New Solution Every Day

Business Process Outsourcing (BPO) is the delegation of one or more IT-intensive Business Processes to an external provider that in turn owns, administers and manages the selected process based on defined and measurable performance criteria. Availability of highly qualified skill pool and faster adoption of very well-defined Business Processes leads to higher productivity gains without compromising on Quality.

We have a customized Onsite-Offshore model to get the best of both. In that, project planning and requirement gathering are executed onsite at the client's location. The subsequent phases of the project, such as knowledge transfer, test design and test execution, are then carried out offshore at Abaska Tech.

Being an Offshore quality partner, we take deep interest in our partners, we offer a well-designed Offshore Testing model that focuses on helping customers to achieve maximum productivity that helps to increase the savings anywhere in between 30-50%.

Take the Lead

Together We can Achieve

Our company environment leads people to get inspired, motivated and committed. Our team has extensive experience in handling projects and offshore engagements.

At Abaska Technologies we strive to keep attrition at low levels by maintaining highly motivated teams through incentives, recognitions and awards.

We provide to our employees all necessary conditions and motivation for professional and career growth. Working as a team is the most efficient way of project development.

The quantity and scope of projects has increased and the geography of clients has extended. We pay special attention to retaining existing staff and recruiting more professionals. Our specialists have stayed with the company for many years and possess proven engineering and communication skills working in large-scale and mission-critical projects.

At Abaska Technologies teams work in close collaboration, results in the timely completion of each phase of the Product Development Life Cycle. Over recent years, Abaska Technologies has become a dynamically developing company.

We are closer to you than you may think.

Why Abaska Tech?

Increased Efficiency

Organization that does everything itself has to invest much higher in research, development, marketing and distribution expenses, all of which is passed on to customers. An outside provider's cost structure and economy of scale can give your organization an important competitive advantage.

Reduced Labor Costs

Hiring and training staff for short term or peripheral projects can be very expensive, and temporary employees don't always live up to your expectations. Outsourcing provides skilled, experienced and dependable labor which can get things done in the best possible way.

Start New Projects Quickly

A good outsourcing organization has the resources to start a project right away in most effective and efficient manner. Handling the same project in house might involve taking weeks or months to hire the right people, train them and provide the support they need.

Focus on your Core Business

Every business has limited resources, and every manager has limited time and attention. Outsourcing can help your business to shift its focus from secondary activities towards work that serves the customer, and it can help managers set their priorities more clearly.

Level the Playing Field

Most small firms simply can't afford to match the in-house support services that larger companies maintain. Outsourcing can help small firms act "big" by giving them access to the same economies of scale, efficiency and expertise that large companies enjoy.

Reduce Risk

Every business investment carries a certain risk factor, markets, competition, government regulations, financial conditions and technologies that change very quickly, therefore by outsourcing businesses, these risks are managed for you as their skills allow them to decide how to avoid risk in their areas of expertise.
